

ENVIRONMENTAL POLICY

AMW is committed to implementing environmental management procedures and systems with a view to achieving certification to ISO 9000, followed by ISO 14000.

Not only will AMW comply with all legal, statutory requirements but will also take additional measures under our own initiative to exceed these requirements. We consider and try to reduce the environmental impacts of all our products and services at all stages of their design, production and implementation. It is our policy to consider the environmental impact of our suppliers/contractors and to encourage them to reduce their environmental burden as much as possible. The Company also actively follows a waste minimisation policy in all aspects of its business.

AMW ensure that its staff are fully aware of its environmental policy and understand its significance in their day to day activities. Moreover, AMW ensure that its staff is trained to undertake all activities with a respect for the environment, placing a minimum of burden on it.

AMW will communicate its environmental performance to the public and other agencies. As part of this it will publish environmental objectives and targets. Finally, AMW will strive to achieve continued improvement in all areas of its environmental performance.

AMW has achieved the highest level of accreditation by the UK Spill Contractors Accreditation Scheme to the standard supported by the Environment Agency for England and Wales, the Scottish Environmental Protection Agency, The Northern Ireland Environment Agency and the Maritime and Coast Guard Agency and through constant appraisal and re-accreditation has set new environmental standards for others to achieve.

This Policy will be reviewed annually by the Managing Director.
